SUMMARY

I am a Computer Science undergraduate with a strong foundation in Python, SQL (MySQL PostgreSQL), and front-end web development, including HTML, CSS, and JavaScript. I am passionate about software development and eager to contribute to impactful tech projects by writing clean, efficient code. I also have knowledge of Generative AI, which adds to my ability to work on modern, innovative solutions. I am actively seeking an entry-level opportunity in Python development, web development, or any tech role where I can grow, learn, and bring value to the team.

EDUCATION

Pratibha College of Commerce and Computer Studies,Chinchwad, Pune   2022 – 2025
B.Sc. - Computer Science   *Pimpri-Chinchwad, Pune*

PROJECTS

Turtle-Crossing 🔗 | Python, Turtle-Graphics
- Developed a Python game using the Turtle graphics library where the player guides a turtle across a road filled with moving cars.
- Implemented object-oriented programming with separate classes for the player, cars, and scoreboard.
- Incorporated keyboard controls, collision detection, and increasing difficulty with each level.
- Demonstrated skills in Python, event handling, animation, and basic game logic.

Portfolio 🔗 | React, TailwindCSS, Framer Motion, Vite, ESLint, Vercel for deployment
- This is a modern portfolio website built with React and TypeScript, featuring a responsive design using TailwindCSS for styling.
- It showcases projects, skills, GitHub contributions using react-github-calendar, and contact information in an interactive layout.
- The site has a dark/light theme toggle, smooth animations using Framer Motion, and client-side routing with React Router.

Profile-Explorer 🔗 | JavaScript, HTML/CSS, Leaflet.js, JSON
- A web application for viewing, adding, editing, and deleting professional profiles, each with detailed information and contact data.
- Provides real-time search and filtering by name, location, and interests, with a responsive and user-friendly interface.

Tracalorie 🔗 | HTML, CSS, JavaScript, Webpack
- This is a calorie tracking web application that helps users monitor their daily calorie intake and workouts
- Users can add/remove meals and workouts, set daily calorie limits, and track their progress
- The app features a responsive UI with Bootstrap styling and persistent data storage using localStorage.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript
Technologies/Frameworks: HTML5, CSS3, React, MongoDB, TailwindCSS, MySQL, PostgreSQL
Developer Tools: VS Code, PyCharm, IntelliJ IDEA, Cursor, Git-Github

CERTIFICATIONS

- Certificate of completion for "React and Redux Certification Test" from Complete Coding.
- Certificate of Completion for "Shopify Theme Development" from UDEMY.
- Certificate of Completion for "Generative AI" from UDEMY.
- Certificate of completion for "Understanding APIs and RESTful APIs Crash Course" from UDEMY.
- Won a 3rd place award and a prize for our "AI Powered Pratibha Wizardry" App in the Explorer Intercollegiate Project Competition, Pune
