PROFESSIONAL SUMMARY

Entry-level Data Analyst with strong self-driven experience in Python, SQL, Excel, Power BI, and data visualization. Skilled in collecting, cleaning, analyzing, and presenting data to derive actionable insights. Hands-on experience building analytical and AI-assisted applications, dashboards, and reporting solutions. Seeking a junior data analyst role to apply analytical skills in real-world business environments.

TECHNICAL SKILLS

- **Data Analysis:** Data Cleaning, Data Transformation, Exploratory Data Analysis (EDA), Reporting
- **Programming:** Python, SQL (MySQL, PostgreSQL)
- **Data Visualization:** Power BI, Tableau, Excel (Pivot Tables, Charts, Lookup Functions)
- **Databases:** PostgreSQL, MySQL, MongoDB
- **AI & Automation :** Google Gemini API, LangChain, LangGraph, n8n
- **Tools:** Power BI Service, Jupyter Notebook, Git, GitHub, VS Code, Google Colab

PROJECTS

AI Interview Performance Analysis Tool

Python | SQL | Streamlit

- Developed an AI-driven system to generate interview questions and analyze user responses.
- Processed and evaluated input data to generate performance scores and feedback metrics.
- Visualized analytical insights using interactive dashboards for performance evaluation.

Power BI Sales & Performance Dashboard

Power BI | Excel

- Designed an interactive Power BI dashboard to analyze sales performance and key business KPIs.
- Performed data cleaning and transformation to ensure accurate and reliable reporting.
- Used charts, tables, and filters to deliver actionable business insights.

Power BI Data Analysis & Visualization Project

Power BI | Excel

- Created dynamic reports using slicers and visual interactions for deeper data exploration.
- Analyzed trends and patterns to support data-driven decision-making.
- Improved dashboard usability through effective visual design and layout optimization.

DOMAIN KNOWLEDGE

- Business Data Analysis
- SQL-Based Data Extraction and Reporting
- Data-Driven Decision Making
- AI-Assisted Data Automation
